Key insights:

- Engagement is inconsistent, indicating a need for a structured content strategy
- Reels outperform photo posts in engagement
- Peak engagement occurs on select posts, showing content preference patterns
- Midday posting (10 am–1 pm) performs better

Strategic recommendations:

- Increase focus on reels to boost engagement
- Post consistently during peak hours
- Improve captions to drive interaction
- Test content formats (try-ons, styling, behind-the-scenes)

These strategies aim to improve engagement consistency and increase overall content performance
